

LETTER TEMPLATE

Dear (Title and Last Name),

I am writing to share the progress and impact of Habitat for Humanity Saint Louis and to respectfully request your continued support as we move forward.

As a (Board Member/Donor/Volunteer) with Habitat Saint Louis for over (length of time), I have seen firsthand how this work impacts (individuals, families, neighborhoods, constituents). **OPTIONAL: ADD PERSONAL SENTENCE**

Last year's State of MO allocation of \$250,000, leveraged with other local public funds and private donations, allowed Habitat Saint Louis to achieve several meaningful outcomes that directly benefit (constituents/community/state/district). Among our key accomplishments:

- Eight first time low-income buyers purchasing single family affordable homes in St. Louis City neighborhoods like Hyde Park and Gravois South Jefferson or in University City, St. Louis County.
- Over 600 volunteers engaged in the construction of Habitat Saint Louis homes.
- Almost 100 projects completed in the Home Repair program serving existing low-income homeowners.

This work has been strengthened through partnerships with public agencies, nonprofits, private-sector partners, philanthropic organizations, or community groups, allowing us to align resources, share expertise, and maximize the impact of every dollar invested.

These results were made possible in part through the leadership and commitment of elected officials like you, and they demonstrate the value of sustained investment in affordable housing and our neighborhoods.

Looking ahead, ongoing support from the State of MO will allow us to continue to serve families in need of decent affordable housing, especially following the devastating tornado last year. With your continued backing, we can build on our success and ensure that homeownership opportunities continue for the people we serve.

Thank you for your time, your service, and your continued dedication to the residents of Missouri and their pursuit of affordable homeownership.

Respectfully,

(Your Name Here)
